BILL NOW A LAW

With the great demand for metals in the near future the calls for more of the different metals and necessary products will surely create a demand for new mines and deposits of earths. Every part of the southwest will feel the impulse of this stimulus.

KILLED BY FALL IN SHAFT

Mr. Peet, who obtained an interest in the mine was trying to get it in shape for a large output when he met his death.

OATMAN STOCKS

The lower Oatman stocks again advanced slightly this week while the dividend-paying higher priced stock shaded off a little.

ENGINEERS HERE EXAMINING MINES

Messrs. Fay and Humphreys are among the big mining engineers of the country and are well known in all the mining camps of the west.

DIAMOND RUBBER CO.
REPRESENTATIVE HERE
S. V. Marks, representative for the Diamond Rubber Company of San Francisco, California, was a visitor to Kingman last week, coming here to attend the wants of his local distributors, who are finding it necessary to replenish their depots.

FOR RENT—Adobe house, corner 3rd and Maple streets. Inquire of I. N. Hart. Blue 193.

ALL ON THE GROUND

Many stopes have been opened in the mine and the property is in shape to send a big tonnage of ore to the mill as soon as it is in commission. The mine is opened to the 900 and shows ore on every level, the widest part of the vein being 16 feet of pay material.

**FILE NOTICE TO HOLD
CLAIMS UNDER LAW**

This resolution is similar to one relieving men in the naval or military arm of the government, with exception that those enlisted men are relieved from work upon their claims until they have been mustered out of the service for a period of six months.

The Miner man has been asked many times if a notice to hold mining claims, filed in 1917 and setting out that the notice is filed for the purpose of holding said claims for the years 1917 and 1918, are sufficient. We believe not, as the law specifically sets out that the notice must be filed for each year, as a reading will disclose.

**W. T. SMITH OF THE
LEVIATHON HERE**

W. T. Smith, one of the big shareholders in the Leviathan mines, was a Kingman visitor last Saturday, going out to the mines to look over conditions. He was met here by Mr. and Mrs. E. M. Kelley who took him to camp. He was called away before reaching any conclusion regarding the future of the property, but is expected to return shortly.

The Leviathan is one of the largest molybdenite properties in the United States and it should be equipped to handle not less than 500 tons of ore daily.

4500 POUNDS OF COPPER

The Emerald Isle is opening up a lory hole in the property, the incline going down about 60 feet. A raise will be carried to the surface through the ore body and a pocket put in in which the ore will be shot down, this will obviate the necessity of handling the broken ore, as at present. The estimate shows about 200,000 tons of 3 per cent ore in sight, while a small amount of work would more than double this figure.

NEW MINING BULLETIN

Bulletin No. 93 (Mineral Technology Series 21) on "Field Tests for the Common Metals in Minerals," by George R. Fansett, Mining Engineer, University of Arizona, has just been published by the Arizona State Bureau of Mines. This bulletin is written in simple, ordinary language so that people with an average education can understand the method of making the tests for the different metals in minerals. Copies may be obtained free of charge upon application to the State Bureau of Mines, University of Arizona, Tucson, Arizona.

CARLOAD OF ORE SOON BE SHIPPED

J. J. Connelly has 3000 sacks of splendid ore on the dump of his mine, near Cerbat, ready for shipment to the smelter. The average of the ore is said to be in excess of \$140 per ton of gold. A carload will soon be on his way to the smelter. Mr. Connelly has been driving an adit drift in this property the past six months. The drift shows an ore body between 2 and 4 feet in width, the average of which is very high. The mine was at one time owned by the late Byron Collins and was opened to some extent. Since that time it was in various hands, but none of the men cared to work the property. Mr. Connolly, believing that the mine had merit proceeded to open it up with the result that he now has one of the most promising gold properties in the district.

CARD OF THANKS

We sincerely thank our friends for their many kindnesses during our late bereavement.

MRS. C. N. NICKELL
MRS MATTIE OVERSTREET
MISS LULU OVERSTREET

JACK MADDUX HAS "FLU"

J. C. Maddux, one of the best known business men of Kingman, was taken ill with influenza yesterday, but is getting along nicely. One of his children also is suffering with the disease.

NOTICE

Any bills due on account of the late F. C. Lauzon will be paid by mailing same to M. B. Lauzon at Chloride properly certified.

CHANGES ARE ANNOUNCED

Secondly they have made the further licensing of fireworks unnecessary.

The above is the gist of an order to J. H. Smith, explosives licensing agent for Kingman bearing the date of November 14, 1918.

FROM WRONG DUMP BUT RIGHT MILL

The Miner had a story last week of the big trucks hauling ore from the Carter property at Oatman to the big United Eastern Mill. We were mistaken in the place whence the ore came, but the mill was the destination. The ore is being taken from the dump at No. 1 shaft, and 60 tons daily is going to the mill from that place. It is excellent ore, having been extracted from the first ore body found in the property. One of the truck drivers mentioned the fact that they were using the Carter house and under the misapprehension we understood that it was the mine that was sending out the ore.

On the other hand the Carter had a considerable tonnage of ore that will average above \$25 that could be milled to advantage at this time and it is to be hoped that something will be done with it.

COMPANY DIES OF "FLU"

Mr. Hoyt was an old time newspaper man and for the past twenty years has been prominently identified with the New York Times, of which publication he was Telegraph Editor. Mr. Dudley received a letter from Mr. Hoyt recently in which he said he had been ill with the influenza but was recovering and hoped to be at his office shortly. Mr. Hoyt was a life long friend of Mr. Dudley, having been connected in business with Mr. Dudley's father many years ago.

BY MAGMA CHIEF COPPER

The Magma Chief Copper company has purchased the Sombbrero Butte group of mines and the Copper Creek mill, situated in the Copper district, Pinal County. The claims are said to carry good values in copper. The equipment of the old Picket Post gold mines company will be erected on the new property and the work of development started up on a large scale. The mines have been developed to a slight extent, but the showing of ore is exceptionally good. The company is financed to carry on an extended development campaign. This company operated in the Superior camp, but owing to the fact that nothing of importance was developed it was decided to go elsewhere, with the result they believe they have obtained a property worth while.
